

GCG Game Plan

How the right people get the right tasks

What it is

A team system on your phone. Each person builds a profile once. Then every event's tasks go to the people they suit, with the reason shown.

What it saves

Long WhatsApp threads, guessing who is free, and tasks nobody owns. People only see what matters now, most important first.

What it keeps

A record of who did what, event by event, so credit and pay can be fair later.

How to read this

Each page shows a real screen with red numbers. The numbers match the notes beside it. Page 2 follows one example event from start to finish.

Example: a corporate welcome game

Follow one event from the first draft to the thank-you. All details are made up.

1 Hinda sets it up (draft)

Who: Hinda

Event: welcome game for 60 guests at a client's office, Friday 18:30. The corporate template creates about 38 tasks. Hinda takes off Venue and DJ (the client has both) and adds one extra: Bring lamps for atmosphere. The team cannot see any of this yet.

2 The 20-minute kickoff call

Who: Everyone

People say what they can and cannot do. Live, Kofi (logistics) takes Set up and Tech check, Esi (sales) takes Confirm the client contact, Ama takes Hosting. Nobody is given work they said is not for them.

3 Hinda publishes

Who: Team

The event appears on everyone's Plan. Taken tasks show on each person's Home. Whatever is left shows as Up for grabs, first come, first served.

4 Two weeks out: Before the event

Who: Each person

Home shows only Before-the-event tasks, most important first. Ama sees Confirm the guest list on top. Kofi ticks off Book transport. If Kofi is stuck he taps I need help and picks Esi, who gets a notification.

5 Event night: During the event

Who: Each person

The screen switches to During the event: doors, hosting, score keeping. Earlier tasks are done and out of the way.

6 After: thank-you and record

Who: Hinda

After the event: thank-you messages, photos, debrief. Every finished task is saved to each person's trail. Hinda can export the year's records as a spreadsheet.

Example: a finished profile

This is Ama's profile after about ten minutes. She made it once, and it works for every event.

Game Plan

GOLD COAST GAMES · PLAYER CARD

Ama

**THE WELCOMER
+ DEAL MAKER**

- Welcoming people
- Persuading and negotiating
- Fixing tech and problems

New to the crew

↑ Share my card ↓ PDF

📷 Change photo

Who sees what

My title

For now you help across several jobs. When Hinda gives you a title, it shows here.

What I like and don't

Tap any job to change your answer.

UP FOR

- Community strategy
- Hosting
- Sound and atmosphere
- 📧 Guest messages and replies

WOULD TRY

- Welcome and door
- Partner outreach

Works best: With one or two others · A goal with some guidance

Your GCG trail

Everything you finish is recorded here, event by event - so your contribution is seen and remembered.

- 1 Player card**
Her name, her type (The Welcomer + Deal Maker) and three strengths. Made from her answers, not typed in.
- 2 Share or save**
She can share the card as a picture or save it as a PDF, for a CV or LinkedIn.
- 3 Who sees what**
Her name and type are always visible to the crew. Everything else is her choice, private by default.
- 4 What I like and don't**
Jobs she is up for and would try, plus jobs she would rather not do. Tasks are matched to this. She can tap any job to change it.
- 5 Her trail**
Every event she helps with is recorded here, so her contribution is seen and remembered.

Built once. Used to match her to the right task every time.

What a team member sees: Home

One calm screen that answers: what do I do now?

- 1 Name and bio**
Their name and one line about who they are, in the banner. Tap it to open their profile.
- 2 Bell**
New messages, task offers and replies. The red number says how many. Tap to read, tap again to close.
- 3 The stage**
Before, during or after the event. They only see tasks for the stage the event is in. Later stages wait.
- 4 Suggested first**
The most important task, with the deadline and Why you (the reason they were matched).
- 5 Say yes or no**
One tap to take it, or to say no. Saying no is easy and the task goes back to the pool.
- 6 More**
The next whole-crew date and Up for grabs: tasks nobody has yet. Take one, first come, first served.

Nobody sees a long list. They see what matters now.

Where the event is heading: Plan

The same picture for everyone on the team.

Game Plan

The plan

Where each event is, how ready it is, and where it is heading.

Sample game night

Mon, Oct 12, 18:30

12 days to go

38 tasks left · 9 still need someone

Plan

due Fri, Oct 2

NOW

Prep

due Tue, Oct 6

Check

due Sun, Oct 11

Play

due Mon, Oct 12 18:30

Report

due Mon, Oct 19

Not started · Plan in 2 days

Next after that: Prep, Tue, Oct 6

Open my tasks

1 The event

Name, date and how many days to go.

2 What is left

How many tasks are still open, and how many still need someone. This is how we spot a gap early.

3 Now

The stage the event is in right now, with its deadline.

4 The road ahead

Plan, Prep, Check, Play, Report. Each stage has a due date, so people see where we are going.

5 How ready

Not started, or the percentage complete, and what comes next.

Everyone sees the same plan, so nothing hides until the night.

What Hinda does first: set the event up

Before anyone else sees the event, Hinda removes what is already handled and adds what is missing.

Draft **1**

The team cannot see this event yet.

Get it right before anyone sees it **2**

- 1. Take off what is already covered.**
Venue booked? DJ sorted? Mark it and it never shows up as an ask.
- 2. Add anything extra this event needs.**
- 3. Assign the people you have already agreed with, then publish.**

What is already covered? (34 left to fill) ^

Lock the venue and terms **Already covered** **3**

Bring in the community partner **Already covered**

Invite and confirm a guest host **Already covered**

Create the Luma event page **Already covered**

Design the flier change **Already covered**

Add a task **Publish to the team** **4**

- 1 Draft**
The team cannot see the event yet. Nothing goes out until Hinda is ready.
- 2 Three steps**
Take off what is covered, add anything extra, then assign the people already agreed on the call.
- 3 Already covered**
One tap per task. Venue booked? DJ sorted? Mark it, add who covers it, and it never shows up as an ask.
- 4 Publish (bottom)**
One button at the end (Add a task and Publish to the team). Then the team sees a clean list, with covered items shown as Already sorted.

No unnecessary asks. No confusion.

What Hinda sees: Today

A short control screen. Where to step in, without reading everything.

1

Bell

Ideas and leads from the team, requests for an extra hand, and help requests.

2

Four counts

Events coming up, tasks needing attention, offers waiting for an answer, and company areas with too few people. Each one opens the right place.

3

Need attention

Turns red when something is late, stuck or declined.

4

Needs you

The few things only Hinda can fix, each with one button. Below it: Up for grabs, if Hinda wants to take one.

Hinda watches the gaps, not every task.

Where the company is thin: Coverage

Every area of GCG as a tile, with a dot for each person who does that kind of work.

- 1 Only one person**
A red dot: one person holds this area and nobody can cover them. This is a risk before it becomes a problem.
- 2 Three or more**
Green dots and names: this area is safe. Tap to see who, and which urgent jobs still have no one.
- 3 No one**
An empty red circle: nobody has said yes to this. This is the list of who to recruit next.
- 4 Urgent jobs**
The tile also lists jobs in that area with no one on them, so the fix is specific.

This is the recruiting list, built from what people actually said.

Keep the record. Start this week.

Everything a person finishes is saved, for fair credit and pay later.

What Hinda can export (as spreadsheets)

- All task data: every task, who, when it was offered, taken and done, and how late.
- Contributions by person and year: events, tasks done, small, medium and large, on-time rate.
- One person's full record, from their card in Team.
- Everyone's profiles, and a PDF report for each event.

A sample row from the yearly sheet (example)

Person	Year	Events	Tasks done	Small	Medium	Large	On time
Ama	2026	4	11	5	4	2	91%

How to start

- 1 Everyone builds their profile on their phone (about ten minutes).
- 2 Hinda sets up the event as a draft and marks what is already covered.
- 3 A 20-minute call: people take their tasks live, then Hinda publishes.
- 4 The team follows their Home. Leftovers are up for grabs.
- 5 After the event, export the record and hold a short debrief.
